Beyond EVV mandate

The EVV mandate was the last call for all home care agencies to catch up with technology. Once on board, providers are facing the challenges of having to deal with multiple insurance companies, multiple platforms and apps, language barriers, dated systems with poor user support... The consequences are big gaps in their billing-revenue cycle, high attrition rates, and burnout, little or no growth, among others.

Learn how InMyTeam tackles all the industry pain points with a solution that helps providers grow their business, retain employees, deliver a better care and optimize operations.
